USER

1. Visit the link now, you arrive at the home page. There is a menu bar across the middle of the page with links to the various pages. Once you have sufficiently appreciated the perfect page, click on shop to see our products.

2. You should arrive at the Home page. Feel free to go to sign in or register a new account, or if you'd rather skip straight to the website, we have provided a newly made account with the credentials listed above.

- a) At the register page, you can enter your account information. Uploading picture as your profile. Note that the email field requires an input containing a "@", and that the two passwords entered must match (one Upper-case lower-case number).
- b) Address information: The country you select here will determine whether your shipments will need to be smuggled to you as opposed to regular delivery options.
- c) Payment Details: you'll need to add a payment option first. Select a payment type from the drop-down menu, and add the necessary information to the dynamic fields that appear.
- d) finally, you should accept the terms and conditions for sign up this service after click "[Privacy Policy](#)" to read "H.E.L.P Privacy Policy".

3. Now that you are logged in, click the shop link at the top to begin browsing our wares. You may also navigate directly to this page by searching for a product using the search bar. From here you can filter your searched items (or all items, if you didn't search for anything) by checking the boxes next to the categories you wish to view, and/or by setting minimum price/ratings or maximum price. Find a product that interests you, and continue by clicking on either the picture or the name of the product.

4. On the product page, you can see the details and description for the product, as well as the reviews left by other users. If you wish to purchase the item, click the "add to cart" button. You should get a feedback text telling you that you successfully added the item.

5. Now, you can click on the shopping cart icon on the top bar to check which items you have added and the quantity of the item. You can update the quantity of the items in your cart. Simply change the number in the quantity field. If you wish to remove the item from your cart, click the grey X next to the item and it will be deleted. During all of this, the total price of the cart will keep you updated as to how much you will be spending.

6. Now you can click on "Continue Shopping" to go back to our product list. Continue adding items to your cart until your capitalist thirst is satisfied.

9. Once you're satisfied with your cart, click on "Check Out" to go to our checkout page.

10. If you click “yes”, the billing information used would be the same as the information provided when you registered the account, and clicking the confirm purchase button will place the order and clear the cart.

11. Otherwise, click the “change” button to enter your new information (now profile, new billing information, new password). You also can review your orders.

12. Comment/ user review

If you wish, you may return to a product’s item page and write a review. To do this, simply navigate to one of the item’s pages as done above, and scroll down to the reviews. Choose your rating of the item, type in the review, and click the post review button. If you had a change of heart on how you view this product, you can also remove your review at any time.

13. Profile Page

You can also hover your user picture in the top right of the nav bar, to see your account options. You may change your password (this would require a valid email being used in registration), or view your orders.

ADMIN

The admin users are directed to Admin Home page as they log in. Admin users can see the visualized sales information including the number of orders/items sold, total revenues, split of different types of products sold on the current day and/or the past week. Admin users can always go back to this page by clicking the site logo at the top-left corner.

By clicking on the “Add Product” link on the top menu bar, admin users can add new product to the system. A product ID will be automatically assigned. The form validates input before they are submitted: all fields except for the category are required to add a new product; the unit price allows only positive currency; the stock allows only positive integers. Photo uploaded is limited to 100KB in size.

By clicking on the “View/Edit Product” link on the top menu bar, admin users are able to view all the products as other users would. Filters on item type, price range and user reviews are available.

By clicking on one of the product names or pictures, admin users can view and edit all the details of the product. Except for the product ID which was assigned, all other fields can be edited.

By clicking on the “Customers” link on the top menu bar, admin users can view all the customer users in the system. Admin users can search for a user by email or name (e.g. searching “Lyle” for Lyle Byle), view comments and orders made by an active user, and disable/enable a user. When a user is disabled, all their comments will be deleted while their billing information and profile picture stays in the database (and can be restored when they’re enabled). The orders will be kept, however they’ll be no longer associated with the user.

By clicking on the “Customers” link on the top menu bar, admin users can view all the orders with items in each order. Orders can be searched by email or order date. By clicking on the email corresponds to each of the order, admin can view the corresponding user’s information.

By clicking on the “Reviews” link on the top menu bar, admin users can view all the reviews and delete any of them. Reviews can be searched by time posted, user email, or the content of the review. By clicking on the email corresponds to each of the reviews, admin can view the corresponding user’s information.
